PROFILE

Cloud Native Practice Providing cloud advisory and consulting services to customers including assessments, presenting recommendations on migration road maps, Design architecture, pricing cost optimization, FinOps etc. Current architecture analysis – analysis of how apps and workloads are currently deployed. Led Cloud Assessment team (21 members including 8 data analysts) and Cloud Application Migration Strategy Team comprises of Cloud engineers, Software developers and Data analysts. Allocating resources to ongoing projects and enforcing deadlines. Conducted current state assessment of Infrastructure framework to identify gaps and recommend solutions. Leveraged Assessment results to enhance existing framework and designed strategic solution for owners and users. Ensuring enterprise-wide needs for due diligence, risk assessment and continuing vendor monitoring are being accomplished. Developing & implementing data analyses, data collection, other strategies that optimize statistical efficiency and quality. Installation and configuration of Cloud discovery tools create application stacks and dependency charts. Provide Security and compliance management with centralized threat analysis and remediation. Application Portfolio management tools for building IT intelligence and performing volume analysis. Extensive experience on Cloud assessment tools like Cloudscape, Cloudamize & Movere for data discovery. Deployed Azure Migrate, Cloudscape, Cloudamize, Movere Data Discovery Tool onsite to fetch client infra details and visited onsite three times. Analyzing data captured from various source like CMDB, assessment tools, workshops questionnaires etc. Interpreting data, analyzing results using statistical techniques by HCL Application Portfolio management tool Dprizm. Supported multiple projects end to end for cloud migration planning, assessment and craft phase. Recommendation of Cloud Service Models based on discovery and workshops. Conduct Interviews & Workshops provided remediation and treatment Plans for applications. Deliver the Cloud Go/No Go candidate status with treatment plan after cloud application assessment. Delivering Azure IaaS, PaaS and SaaS models and providing best-fit solutions. App/Infra for High Availability under public, private, hybrid cloud models. Create App-Infra Mapping and make stacks according to current Infra finding by data discovery tools. Point of contact between offshore implementation team and functional experts to convert business needs into reporting solutions. Worked on Azure Cloud offering, sizing, capacity estimation, Pricing, transition roadmap, conduct workshops. Design Azure solutions & pricing from conception to delivery. Work on RFP, RFI, RFQ, BOQ, BOM, SOW, Pricing and Bids defense planning, FinOps. Interacted with Clients, Directors, VPs, OEM partners, Vendors, & other Stakeholders on a regular basis through face-to-face interactions/ video conferences / teleconferences/ mails to understand client's processes and business problems. Helping customers to run their workloads in the cloud in a cost effective and efficient manner and leading FinOps team and work activities.

Supported to perform POC whenever required with cloud engineers, create and maintain project related documentation. Hands-on implementation of the Azure delivery dealing with IAAS Infrastructure (VMs, Storage, Azure Services, Web App, logic app, Azure Active Directory, RBAC, Key Vault, deployment) and deploying applications as PAAS (Websites, Data factories, Data lake),

Implementing SAAS Services like Backup Vaults, Recovery Service Vaults, Key vaults, Azure Event Hub, Azure Data Factory. Led to Cloud delivery & migration team as well as provide Presales & Post-sales support Worked closely with sales and service delivery team to ensure seamless delivery & customer satisfaction Create Decks & suggest Treatment Plans for Cloud Migration. Support till project delivery
